INVESTMENT STRATEGY

The assets are invested in investment objects linked to the world equity market: stocks, exchange-traded funds, index funds or other objects that invest in global equity markets, taking sustainability themes into account. Proportion of alternative investments may represent up to 30% of the assets. In order to reduce the investment risk in the event of adverse market conditions, part of the assets may be invested in money market instruments, money market funds, deposits with a maturity of 12 months or less.

COMMENT

The first quarter of 2024 was marked by strong share price growth. While market participants' expectations for a rapid rate cut have moderated, better-than-expected economic indicators and corporate performance in Q4 significantly increased the likelihood of a soft landing scenario in the world's leading economy, the US. While almost all sectors had a good start to the year, investors' optimism about the rapid development of the use of artificial intelligence was particularly favourable for the technology sector, which grew by more than 15% in the quarter.
